DETAILED ACTION

1. Claims 12-23 are presented for examination. Applicant filed an amendment on 4/15 2003, amending claims 12, 20, and 21. Applicant also filed a response on 9/2/2003 to a Rule 105 Request for Information. After careful consideration of Applicant's arguments and amendments, the Examiner maintains the rejection of claims 12-23 based on 35 USC 103. However, new grounds of rejection are established in the instant office action based on 35 USC 112(1) and 35 USC 112(2) as set forth in detail below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 12-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

As to claims 12, 20, 21 and 22, the specification fails to enable one of ordinary skill in the art as to how the claimed processing the databases by sorting and matching the non-corresponding sequences of insurance, driver, and vehicle databases using a plurality of algorithms to generate a working database of uninsured motorists to a pre-determined high degree of reliability in excess of 95 percent of matching

drivers/vehicle/policy. The specification fails to describe the algorithms or how the algorithms are used to sort and match the data. The specification also fails to describe how the algorithms process the data in order to generate a working database of uninsured motorists to a pre-determined high degree of reliability in excess of 95 percent of matching drivers/vehicle/policy. How does the system and method ensure reliability in excess of 95%? Therefore this limitation will not be considered.

Furthermore, claims 13-19 are rejected on the same basis based on the claims dependency on claim 12.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 12-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claims 12-21, the feature "whereby the data in the three databases do not necessarily have common cross indexing categories" is indeterminate in that it cannot be determined from the claim language whether the databases have or do not have cross indexing categories. Therefore, for purposes of applying prior art, the Examiner will interpret this limitation to mean that the databases can have cross indexing categories.

Response to Arguments

6. Applicant's arguments with respect to claims 12-22 have been considered but are moot in view of the new ground(s) of rejection. As an initial matter, the rejection of claims 12-22 based on 35 USC 103 has been maintained. The Examiner repeats the response to arguments and the grounds of rejection based on 35 USC 103 as established in Paper. No. 13. Furthermore, the Examiner will respond to the arguments directed to the 35 USC 103 rejection of the claim limitations that were rejected based on 35 USC 112 in a subsequent office action if the Applicant can overcome the 35 USC 112 rejections.

7. The Examiner acknowledges Applicant's response to the Rule 105 request for information and Applicant's response fulfills Examiner's request for information.
